

We LOVE our KLOVE station here in Texarkana, AR. It is the only station we listen to at all on our radio. This station has meant a great deal to our family. We have 2 small children and it's the best thing out there for them to listen to. We can't get local news, but we get Christian/World news from the station. We can get local news on TV. Removing this station from our listening area would devastate us. KLOVE provides so much to our community. It doesn't matter how far away they are, they feel like they are your neighbors down the road. You can call anytime of day with any problems and be lifted up in no time. It is in the public interest to keep this station! Children and adults benefit so much from it. When teens listen, their worlds become calmer and much more peaceful. We need good, quality radio to listen to. If it is taken away, all good that has been done will go with it. Please don't take away the good out there, do away with the bad. There is nothing at all wrong with this station!!! FCC needs to direct their attention to TV, that's where the real problems lie!
